

YL CONNECTOR

<Meets glow wire testing standards>

4.5 mm pitch/Wire-to-Wire connectors/Crimp style and Mating style

This is a 4.5 mm pitch, wire-to-wire connector that comes with glow-wire compliant housing material and allows the use of retainers.

- **Glow-wire compliant**

Meets the GWT 850°C standard, ensuring enhanced safety and reliability. Demonstrates improved protection and compliance in a wide range of household appliances.

- **Retainer**

Optional retainers enhance connection reliability by preventing incomplete insertion or accidental contact disengagement.

- **Inner type housing lance**

The contact is secured to a spring-loaded inner housing lance (a resin lance formed inside the housing). The inner housing lance provides a consistent, clear contact insertion feeling. The tactile "click" sensation contributes to improved manufacturing quality and productivity of wire harnesses.

- **Inner lock**

The lock connecting both receptacle and plug housings is an inner lock designed to resist irregular external forces, preventing issues such as lock disengagement.

- **Panel lock**

The receptacle housing is equipped with a panel lock that minimizes wire entanglement while enabling easy and secure mounting on a wide range of panel thicknesses. For design flexibility, a version without the panel lock is also available.

Specifications

- Current rating: 7 A AC/DC (2 circuits/AWG #18)

Note: The table below lists the current rating by number of circuits and wire size, with the assumption that each number of circuits is used.

No. of circuits	Wire size (AWG)					Unit: A
	#18	#20	#22	#24	#26	
2	7	5	4	3	2	
3	6	4	4	3	2	
4	6	4	4	3	2	
8	4	3	3	2	2	
10	4	3	3	2	2	
12	3	2	2	2	2	
20	3	2	2	2	1	

Note: Do not branch in parallel current which exceeds the rated current. If branched in parallel, current imbalance or other problems may occur. If it is absolutely necessary to branch such a large current in parallel, design the circuits without causing any imbalance and provide extra margin for each circuit.

- Voltage rating: 300 V AC/DC

- Temperature range: -25°C to +90°C

Note: Including temperature rise in applying electrical current

- Contact resistance: Initial value/ 7 mΩ max.

After test/ 10 mΩ max.

- Insulation resistance: 1,000 MΩ min.

- Withstanding voltage:

There shall be no breakdown or flashover while applying 1,500 VAC for one minute.

- Applicable wire range:

Conductor size/ AWG #26 to AWG #18

Insulation O.D./ ϕ 1.3 mm to ϕ 2.7 mm

Note: Refer to the "Contact" section on page 2 for information on when two wires are crimped together.

- Applicable panel thickness: 0.2 mm to 2.0 mm

Note: See "Panel layout" section on page 7 for further details.

- * Please refer to the "Handling Precautions for Terminals and Connectors" on our website (listed in the "Technical Documents" column on the Product Information page) before use.

- * RoHS2 compliance

- * Dimensional unit: mm

- * Contact JST for details.

Standards

For information on overseas standard registrations, please refer to the "List of Registered Overseas Standards" on our website (listed in the "Technical Documents" column on the Product Information page).

- * Specifications registered to overseas standards may differ from the general specifications listed above.

- Note: 1. Drill holes correspond to panel layout dimensions to prevent the formation of burrs, etc.
 2. When drilling multiple panel holes adjacent to each other, pay sufficient attention to the strength of the panel.
 3. Please ensure that the panel cutout is oriented to match the connector mounting direction.
